ISBN: 981 04 1420 X Material Identity Number: XX-2000-00782

Conference Title: Proceedings of IPEC'99. International Power Engineering Conference

Conference Date: 24-26 May 1999 Conference Location: Singapore

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: In addition to the normal coverage for direct loss and damage of the mechanical and *electrical* plant in commercial premises, it is also usual that the premises be covered by business *interruption* *insurance*. These days, consequential loss or damage that includes coverage for such items as extra expenses, rental value, profits and commissions, etc., have escalated. It is therefore in the interest of the engineering community, that the reliability of new systems being designed is acceptable and justified in the light of escalating claims for consequential loss or damage. For some existing power distribution systems in Singapore, it may require a re-assessment of the need for additional features such as earth-fault relays to improve the reliability. A case study is presented in this paper to illustrate this point. The case involved a failure investigation that was conducted on a distribution dry-type transformer. (8 Refs)

Subfile: B

Descriptors: earthing; failure analysis; power distribution faults; power distribution reliability; power system relaying; power transformer protection; relay protection

Identifiers: local distribution transformer; protective system inadequacy; business interruption insurance; distribution network reliability; Singapore; earth-fault relay; case study; failure investigation; dry-type transformer

Class Codes: B8140 (Power system protection); B0170N (Reliability); B8120J (Distribution networks); B8350 (Transformers and reactors)

ABSTRACT: Competitive auctions for electric power sources whose operation
will be based upon economic dispatch raise new challenges for auction
designers. The efficient selection and operation of such generation
sources requires revelation of bidder types over two-dimensions, fixed
and variable costs. The way in which fixed and variable prices are
combined into a net score, which determines the winning bids, plays a
key role in influencing bidders behavior. This paper analyzes bidder
strategies and develops necessary conditions of bid scoring systems for
the existence of equilibrium strategies that will result in efficient
operations. Existing and proposed bid scoring systems are examined
using our results.
